

Built-in Automatic Deadlocking Combination Lock

Order at Hogwild
www.hogwild.com
(800) 464-9453

The only built-in lock to offer deadbolt locking security with "Slam-Shut" convenience for single point latch lockers.

1657 SERIES

Exclusive Features

- Combined spring action and dead locking offer the most convenience and security available
- Extra long, 0.374 inch bolt throw offers greater engagement to withstand prying
- Back case is flat, with no combination change button, avoiding jamming from locker contents
- Six built-in combinations for higher system security and longer useful life
- One model for right and left-hand hinged lockers simplifies installation

1657 Operation Summary

Unlocked

- Latching bolt is fully retracted into the case

Opened and Triggered

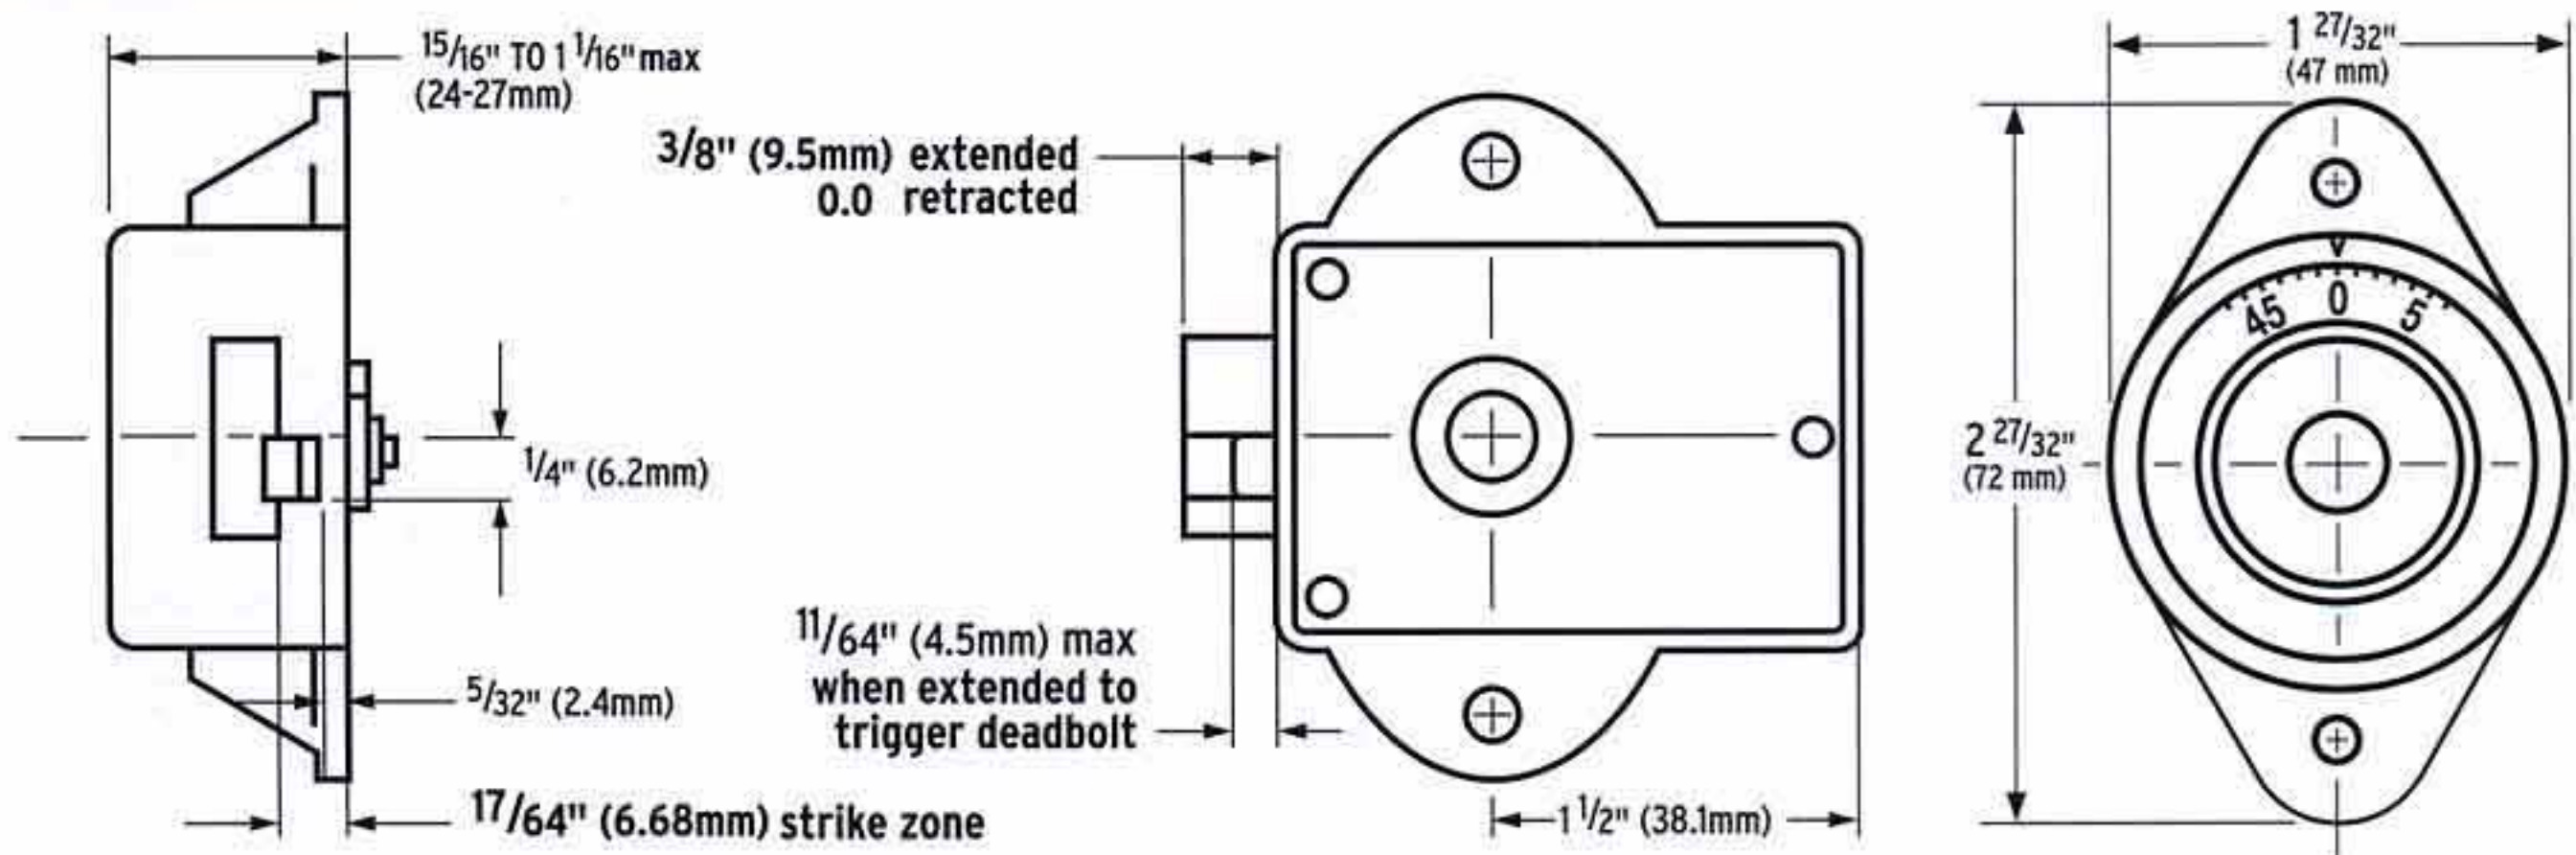

- Latching bolt is extended halfway when dial is released after opening the door
- Latching bolt is spring loaded, and compresses when bolt passes latch hook

Locked

- Latching bolt is fully extended and deadbolt locked
- Lock can only be opened with administrator key or combination
